# AGRICOMA ITALIA

The Agriculture Machines Export Consortium

AGRICOMA ITALIA is a consortium company, with an innovative rationale that becomes a key advantage for those who have to buy agricultural machines: to have only one interface, able to sell and provide technical assistance on a full range of agriculture equipment.

We could synthesize: solve problems, selling only the right and coordinated machines and equipment within a synergy program.

UNACOMA, since 60 years the Italian National Agriculture Machines Manufacturers Association, that generates more than 60% of the EU export of agriculture machines, is part of AGRICOMA ITALIA.

## POST-AGRAme 2009 REPORT

AGRAme is the Middle East's largest Agribusiness Trade Expo in four related areas: Agribusiness, Poultry and Livestock, Fishing and Aquaculture, and Flower and Garden. The latest addition is VETme. The event is held annually at the Dubai International Exhibition Center. AGRame is organized by IIRME, an international organization based in Dubai, United Arab Emirates; and Global Corp Limited is the exclusive agent of IIRME in Nigeria..This year's event was held from March 30 to April 1; and next year's event is slated for March 29-31, 2010.

AGRAme 2009 was quite a success. At this year's event, for the first time there was a Nigeria Pavilion. Under the auspices of Global Corp, stakeholders in Nigeria's agriculture had the opportunity to present their business case to potential investors visiting the Pavilion. On the other hand, potential investors, as well as curious individuals, visiting the Pavilion had the opportunity to make enquiries about the investment climate in Nigeria and particularly the investment opportunities in Nigeria's agriculture. In addition, the MD/CEO of Notore Chemical Industries, Onajite Okoloko, presented a paper on "The African Green Revolution: What's in it for the Middle East?"

MD Notore, Jite Okoloko  
Presenting a Paper at AGRAME 2009

This report on AGRame 2009 covers the buildup leading to this year's event, the actual event, what's in it for Nigeria's agric sector, what's in it for Nigeria's financial sector, AGRame 2009 survey results, post-AGRAme activities of Global Corp, and the preparations for AGRame 2010 in Dubai.

### Buildup to the Event

Prior to the commencement of AGRame 2009, Global Corp deployed a series of media campaigns as a buildup leading to this year's event, including:

- A press conference with NTA 10, Daily Independent, Punch and Business Day newspapers;

- A full-page ad in This Day Newspaper;
- Radio jingles about AGRame 2009 on FRCN Radio on the 7am, 4pm and 10pm Network News time slots;
- A news commentary on the FRCN Network;
- A communication folder on Nigeria's Agric investment potentials titled: Welcome to Nigeria, the Land of Agriculture; and
- Article written by Femi Odulana (ED, Global Corp) in the Guardian Newspapers with the title: "In the Interest of Nigeria's Agriculture."

Copies of the newspaper ad, the radio jingles and the article in the Guardian Newspapers are available at AGRame Secretariat. Your request for all or any of them should be directed to the e-mail address or postal address provided at the end of this report.

### The Event

The event was flagged off at 10am on Monday, March 30, 2009 by His Excellency Rashid Ahmed Bin Fahad, the Minister of Environment & Water of the United Arab Emirates, who was particularly impressed by the fact of Nigeria's presence at the event. The Nigerian team, led by Global Corp LLC, comprised of others like Notore Chemical Industries, AgroNigeria Magazine and the representative of the Federal Radio Corporation of Nigeria. Onajite Okoloko, MD/CEO, Notore Chemical Industries, made a case for Nigeria and indeed Africa's agribusiness in his paper titled: "The African Green Revolution: What's in it for the Middle East?" In addition, there was a live feed broadcast from Dubai venue on FRCN Network.

### The Nigeria Pavilion

For the first time in the history of the AGRame event, Nigeria had a country pavilion, made possible by the sole effort of Global Corp. The pavilion which measured 8 meters by 8 meters in size played host to a range of visitors, including:

- The Minister of Agriculture of the UAE;
- Businesses/Potential Investors, such as:
- A consortium of agric equipment makers;
- Organic fertilizer manufacturers;
- Livestock grazing experts;
- Agro commodity haulage experts;
- Dairy equipment manufacturers/farm specialists;
- Landscaping companies; and
- Irrigation companies.

All visitors to the pavilion were given copies of the communication folder: Welcome to Nigeria, the Land of Agriculture; and their enquiries were taken by Global Corp and its collaborators.

Tremendous interest was shown by several businesses and potential investors in Nigeria's agribusiness in such areas like equipment, organic farming, livestock feed enhancement technology, end-to-end commodity haulage, dairy equipment manufacturing, farm expertise and land lease.

#### What's in it for Nigeria's Agric Sector?

The economy of the Gulf Cooperative Council (GCC) is over USD 560 billion, with combined food import in excess of USD 24 Billion annually which represents more than 94% of their total food expenditure. As a food security measure, member countries of the GCC have resorted to large investments in farmlands abroad. For example, in the last two years, Saudi Arabia and United Arab Emirates (UAE) leased farmlands in Pakistan and Sudan for USD 3 billion and USD1.5 billion respectively. Comparatively, per hectare cost of farmland in Pakistan and Sudan is five times the cost of farmland anywhere in Nigeria.

State government with available lands for foreign lease should contact Global Corp Ltd (GCL) or Federal Radio Corporation of Nigeria (FRCN).

The potential opportunities from AGRAME are enormous for Nigeria's agric sector. In fact, Brazil, Vietnam, Malaysia, Kenya, Australia and Turkey are making billions annually in agric exports to the Middle East. So can Nigeria!

Agriculture in Sudan

Working with global companies through the Global Corp and AGRAME connection, Nigeria's agric sector can realize its entire agribusiness potentials. Bauchi, Sokoto and Kebbi States can generate over USD 500 million within 2 years from dairy products. Cross River, Akwa Ibom and Lagos States can generate over USD 1 billion annually from aquaculture. Kaduna, Nazarawa and Zamfara States can export cereals, including rice, wheat and barley. Plateau State, Obudu Ranch and Mambilla Plateau can generate USD 400 million annually from flora and horticulture.

## Preparations for AGRAME 2010

### What's in it for Nigeria's Financial Sector?

It is regrettable that in 2009 there is absolutely no financial institution from Nigeria with branch offices in the Middle East, particularly in Dubai, an international trading and financial centre that receives over one thousand visitors a day by air from Nigeria. Visitors from Nigeria to the Middle East deserve to conduct their transactions at the branch offices of their major financial institutions in this region. Global Corp can assist Nigeria's financial institutions with the process of establishing branch offices in the Middle East, particularly in Dubai. Through the platform of AGRAME, such financial institution will have a very strong and public sector support from the beginning. With over one thousand (1000) Nigerians entering Dubai a day at US\$10,000 means a total of US\$10m per day.

### AGRAme 2009 Survey Results

According to the Exhibitor's Survey: 59% of the exhibitors agreed that the event increased their business prospects in the Middle East; 82% of the exhibitors will return to the 2010 edition of the event.

According to the Visitor's Survey: 59% of the visitors arranged to do business with a new supplier 95% of the visitors said they are looking forward to attend the 2010 edition of the event.

### Post-AGRAme Events

The reactions gotten from interested investors has necessitated the production of this report, which is meant to stimulate the full participation of the public sector at the National, State and Local government levels.

### Presentation of the Report

The report will be formally presented to the following:

- The Presidency; Ministers of Commerce and Industry; Information; and Agriculture and Water Resources; The DG FRCN, NTA, Chairman ThisDay Newspapers;
- The various agribusiness related organizations: AFAN, MAN, NASME, etc.;
- Agribusinesses practitioners; and other stakeholders.

### MoU with AGRICOMA ITALIA

On April 29, 2009 Global Corp signed a Memorandum of Understanding (MoU) with AGRICOMA ITALIA, a consortium of European Union manufacturers of agric equipments and machineries, in which the two organizations agreed to increase mechanization of agriculture; establish technical cooperation to upgrade agricultural production, improve agricultural services and enhance training courses for better performances with the improved mechanization systems, including irrigation for the nation of Nigeria.

## Global Corp/AFAN South West Zone Press Releases

Global Corp and AFAN South West Zone have met twice post-AGRAME (May 8-9 and May 29-30, 2009) to strategize on how to advance and modernize agriculture in the South West and position agribusiness in the region to focus more on export commodities, (such as organic cocoa, beef and dairy products, wheat, barley, rice, pineapple, citrus, oil palm, cashew, cassava and its derivatives, and raw materials for bio-fuel) for markets in the Middle-East and European Union.

Group Photograph of Executives of Global Corp and AFAN Members

### Post Conference Events

Global Corp has been proactively involved in an array of follow-up activities since the May 30, 2009 press release and conference at Lagos Airport Hotel at Ikeja.

- The Technical Committee report has been sent to Eco-Grow for review.
- The Technical Committee was given another assignment: Estimation of size of land, tractors and other inputs require for each commodity/product to meet the 2015 and 2020 export targets for the South West (organic cocoa, wheat, barley, rice, etc.) in the May 30 Global Corp/AFAN press release and conference.

### Marketing/Communication Blitz

- June 11, 2009: "The Middle East: Opportunities For Agricultural Development In The State," a presentation by Femi Odulana at Ogun State Regional Plan and Stakeholders' Summit in Abeokuta.
- June 13, 2009: Radio Link's one-hour program on Food Security.
- Speakers:** Richard-Mark Mbaram and Tijani Ishola of Global Corp, and Hon. Yisa Mohammed, Kwara State's Commissioner of Agriculture and Natural Resources.
- Planned newspaper adverts to be directed at States, with special focus on land lease to serious investors from the Gulf States for commercial agriculture and to joint ventures between governments (or the private sector) and investors from the Gulf States.

## PRESS RELEASE...MAY 9, 2009

### AGREEMENT BETWEEN GLOBAL CORP AND ALL FARMERS' ASSOCIATION OF NIGERIA (AFAN), SOUTH WEST ZONE

Following AGRAME 2009, an annual agric and global event which showcases agribusiness in Dubai, United Arab Emirates, Global Corp Ltd. and All Farmers' Association of Nigeria (AFAN) South-West Zone held a two-day meeting (May 8-9, 2009) to push for a more proactive, aggressive and environmentally friendly agenda in agriculture for farmers and governments in the South West.

Specifically, the main focus of the two-day strategic meeting and the final agreement are the gradual introduction of organic fertilizers into farming activities in the South West zone of Nigeria for purposes of encouraging good human health, healthy soil, and eco-friendly environment; boosting an agric-based economic growth in the geo-political zone; and introducing modern agronomic techniques in large-scale farming.

To implement this proactive, aggressive and environmentally friendly agenda in agriculture for farmers and governments in the South West, Global Corp and All Farmers' Association of Nigeria (AFAN) South-West Zone agreed to:

- Work with one of the world's major manufacturers of organic fertilizers that has agreed to supply organic fertilizers to farmers in the South West on a 12-month credit term; and is ready to train farmers on the appropriate application of its organic fertilizers to produce world leading crops (such as: cocoa, oil palm, citrus, jatropha, rice, cassava, maize, yam, sorghum, millet, cow pea, pineapple, and other crops of their choice), assist them with packaging to meet international standards, as well as the marketing and sales of these farm produce in the international market; and has agreed to a buy-back plan of 100% of all organically-grown produce at international market price.
- Work with a consortium of European Union manufacturers of agric equipments and machineries that has agreed to provide the latest technologies in agric equipments and machineries to farmers in the South West on a turnkey basis, as well as appropriate training on their usage; and provide a credit line and technical support for three years to ensure return on investment for the period.

Set up a technical committee to work out the modalities for implementing its agenda and work with South West governments, the Federal Government and the approved banks (First Bank and UBA) in order to help farmers in the South-West zone access and benefit from the 200 billion naira Agric Credit Facility, among others.

**A NEW COMPREHENSIVE AGRIBUSINESS MODEL FOR SOUTH-WEST FARMERS**

Today is a historic day for Nigerian farmers of the South West because it is the day when a new comprehensive agribusiness model/strategy is being announced for the South West. Incidentally, this announcement is being made at the Ogun/Ondo Hall of the Lagos Airport Hotel, which is jointly owned by five of the six states in the South West.

As a follow-up to our first two-day strategic meeting, which was held May 8-9, 2009, All Farmers' Association of Nigeria (AFAN) South-West Zone and Global Corp Ltd. reconvened for another two-day meeting (May 29-30, 2009), but this time to consider the recommendations of our joint Technical Committee. The Committee had been charged to design a comprehensive agribusiness model/strategy for all states in the South West, focusing on how to capitalize on the growing demands of countries in the European Union and Middle East for organic cocoa, wheat, barley, beef and dairy products, banana, pineapple, citrus, coffee and raw materials for bio-fuel.

Group Photograph of Executives of Global Corp and AFAN Members

Based on this agribusiness model, the following are our projected export targets for the South West:

Export Commodity	2015 Target	2020 Target
Organic cocoa (Market share of global market)	15%	50%
Beef and dairy products	USD 500m	USD 1,000m
Grains (wheat, barley, rice, etc.)	USD 250m	USD 500m
Pineapple, citrus, etc.	USD 250m	USD 500m
Oil palm and cashew	USD 250m	USD 500m
Cassava products and derivatives	USD 250m	USD 500m
Bio-fuel raw materials (jetropha, cassava, etc.)	USD 125m	USD 250m

In addition, this agribusiness strategy is expected to boost staple food production in the South West, and help reduce or eliminate Nigeria's spending of over USD 150 million per month on rice, wheat, barley and other cereals import.

To achieve these export targets as well as cater to domestic demands, the following are some of the key recommendations of the Technical Committee which were adopted by All Farmers' Association of Nigeria (AFAN) South-West Zone and Global Corp Ltd. as the agribusiness model/strategy, which covers the entire agric value chain, for all states in the South West:

- Setup of a network of specialized commercial farms with a minimum of 20,000 hectares of farmlands and 2,000 participating farmers per local government area (LGA) in each state;
- A minimum holding of 10 hectares of farmland by each participating farmer in the network;
- Use of organic fertilizers at these commercial farms;
- Adoption of full mechanization of farming practices at these commercial farms;
- One nursery and seed multiplication facility per LGA for major crops such as cocoa, oil palm, coffee, citrus, cashew, kola nut, castor, jetropha;
- Adoption of a management approach with collateral managers as coordinators of project activities between Global Corp/AFAN and the network of specialized commercial farms;
- Investments in the development of cottage industries (such as integrated cassava processing mills, grains and oil processing mills, juice and honey processing plants, banana and plantain processing industries, mushroom processing plants, and bio-fuel production plants);
- Investments in the development of R&D, laboratories, storage, merchandising and standardization facilities for farm produce;
- Setup of standardized and functional secretariats, in each of the six state capitals, with state-of-the-art communication equipment and gadgets to coordinate and disseminate information regarding farming activities;
- Use of alternative energy systems (solar and wind energy) to power the network of commercial farms.

The areas of specialization of participating commercial farms include the following: arable crops (root and tubers, grains and legumes); tree crops (cocoa, oil palm, citrus, cashew, mango and coffee); afforestation (jetropha or lalapala, neem or dogonyaro, castor, eucalyptus, locus beans and shear butter); horticulture; floriculture and ornamentals; livestock and animal production (dairy and cattle, poultry, piggy, rabbitry and snailry); aquaculture; mushrooms; and honey bees and honey production. However, for economies of scale and to quickly meet projected export targets, one or two super large commercial farms will be established for all states combined for the following commodities: organic cocoa; cereals (rice, wheat, etc.); and livestock and dairy.

To implement the new agribusiness model for the South West, Global Corp signed a Memorandum of Understanding (MoU) with AGRICOMA ITALIA, a consortium of European Union manufacturers of agric equipments and machineries, in which the two organizations agreed to increase mechanization of agriculture; establish technical cooperation to upgrade agricultural production, improve agricultural services and enhance training courses for better performances with the improved mechanization systems, including irrigation. In addition, Global Corp has signed an agreement with one of the world's major manufacturers of organic fertilizers that has agreed to supply organic fertilizers to farmers in the South West on a 12-month credit term; and is ready to train them on the appropriate application of its organic fertilizers to produce world leading crops (cocoa, wheat, rice, etc.), assist them with packaging to meet international standards, as well as the marketing and sales of these farm produce in the international market; and has agreed to a buy-back plan of 100% of all organically-grown produce at international market price.

Finally, to finance these 20 billion naira agribusiness projects, Global Corp is working with our partners and commercial banks to secure agric loans and credit lines for farmers in the South West.

### The Road to the Future

Global Corp's export and land lease goals to the Middle East for Nigeria's agric sector include:

- A minimum of USD 2 billion in export to the Gulf Region by 2011; and
- Land lease joint venture in excess of USD 3 billion by 2012.

At AGRAME 2010, Global Corp plans to present to global investors, particularly the business community in the Gulf Region, an outstanding Nigerian businessman who has contributed so much to rebuild the country's good image. We hope to seek Prince Nduka Obaigbena, Chairman of This Day Newspaper, to address the global investment audience in AGRAME 2010 at Dubai on the media, opportunities in food security for Sub-Saharan Africa and the Middle East.
